EXPERIENCE

SEPT. 2025 -
PRESENT

Fullstack TypeScript Developer, Architecture & Security

[Gestion Pratique](#) · Puget-sur-Argens

- B2B SaaS architecture: Vue 3 / Nuxt 4 / Next.js front end, NestJS back end, microservices over RabbitMQ and Redis.
- Integration of an LLM (Mistral) for document extraction and classification, GDPR compliant.
- Publication of reusable, maintainable TypeScript npm libraries (service-to-service authentication, semantic versioning, conventional commits), unit tested.
- Security & isolation: HMAC between microservices, Bearer JWT and SSO for users, ACL.
- Infrastructure: setup and administration of Debian VPS servers (hardening); Docker, continuous deployment with GitLab CI/CD.

JUNE 2025 -
JULY 2025

Vue.js Front-end Developer

[Flying Eye](#) · Biot

- Rebuild of Flying Hub (Vue 3.5): migration from the Options API to the Composition API + TypeScript, centralised state with Pinia.
- Vitest tests, Axios API layer (authentication, CSRF), OWASP / ANSSI compliance.

2024 - 2025

Personal projects & skills development

- Personal web projects in TypeScript (Vue / Nuxt front end, NestJS back end).
- Specialisation in back end, microservices and application security.

APRIL 2022 -
FEBRUARY
2024

JavaScript / TypeScript Front-end Developer

[ExAssess \(VTEST\)](#) · Paris

- Design and development of Young Learner (Vue 3 + TypeScript) with integration tests.
- Migration of 3 Vue 2 / 3 applications to Nuxt 3; collaboration with the NestJS back end, AWS deployment.

OCT. 2021 -
DEC. 2021

Fullstack JavaScript Developer

[Skyview innovation](#) · Menton

- Design of an administration and moderation dashboard (Vue + Express API), fine-grained role management through ACL.
- Responsive, secure interface for a community platform.
